FOREWORD
to
SUPPLEMENTARY BIBLIOGRAPHIES

Since the publication of the original fifty subjects of this Bibliography, many favorable comments have been received as to its usefulness. The demand from aeronautical organizations, both in the United States and abroad, for supplementary volumes bringing the subjects up to date, has been so great that authorization has been granted and funds allotted by the Work Projects Administration for that purpose. This supplementary volume is issued in response to this demand.

The Project, sponsored by the Mayor of the City of New York, receives the cooperation of the Institute of the Aeronautical Sciences which directs the research and publishing staff workers.

DISTRIBUTION

Requests for these bibliographies have been received to such an extent that it has been impossible to supply the demand. Because of the limited number of copies published, distribution is necessarily restricted. They cannot be sent to individuals or sold. Organizations desiring copies may apply for same by letter, stating the use for which they are required. These requests will be considered in the order received. Should the supply be exhausted, such requests will receive first consideration when additional copies are published.

BOOKS AND PAMPHLETS

Aerosphere - 1939, by Glenn D. Angle. New York, Aircraft publications, 1940. 1420 p. diagrs., illus., tables.

Aircraft engines, by A. W. Judge. London, Chapman and Hall, 1940. 380 p. diagrs., illus., tables.

Aircraft of tomorrow, by A. Black. New York, McGraw-Hill book company, 1940. 267 p. illus., tables.

American Diesel engines, by Lacey Harvey Morrison. New York, McGraw-Hill book company, 1940. 489 p. diagrs., illus., tables.

Automotive Diesel maintenance, by W. J. Cummings. New York, Pitman publishing corporation, 1940. 113 p. diagrs., illus., tables.

The Diesel engine, by C. H. Chatfield, C. F. Taylor and S. Oker. (In their Airplane and its engine. New York, McGraw-Hill book company, 1940. p. 118-127, 164-169. illus., tables)

Diesel engine manufacturers' association, by M. J. Reed and Otis A. Sibley. New York, Guide printing company, 1940. 141 p. diagrs., illus., tables.

Experimental contribution to the study of combustion in compression-ignition engines, by R. Duchêne. Washington, 1940. 20 p. diagrs., illus., tables. (N.A.C.A. Technical memorandums no. 930) (From Pub. scient. tech. Min. de l'air, Paris, 1939, no. 149, 33 p.)

High speed Diesel engines for automotive, aeronautical, marine, railroad and industrial use, by Peter Martin Heldt. Nyack, N. Y., P. M. Heldt, 1940. 475 p. diagrs., illus., tables.

Recherches physicochimiques sur les carburants et lubrifiants, par R. Kling. Paris, E. Blondel la Rougery, 1940. 65 p. diagrs., tables. (Pub. scient. tech. Min. de l'air, Paris, B.S.T. no. 91)

Transformation of heat energy into work with the Diesel cycle, by Hilton F. Lusk. (In his General aeronautics, New York, Ronald press company, 1940. p. 189-96. diagrs., illus.)

Aero engines and their lubrication. London, C. C. Wakefield and company, 1939. 88 p. diagrs., illus.

Aircraft engine maintenance for the engine mechanic, by D. J. Brimm, Jr. and H. E. Boggess. New York, Pitman publishing corporation, 1939. 470 p. diagrs., illus., tables.

DIESEL AIRCRAFT ENGINES

Aircraft of the British Empire, by Leonard Bridgman. London, Sampson, Low, Marston and company, 1939. 158 p. diagrs., illus., tables.

Boost control for aero engines, by Ernest W. Knott. London, George Newness, 1939. 36 p. diagrs., tables.

Diesel engines and Diesel electric power, by Ellis L. Richards. Chicago, H. J. Drake and company, 1939. 304 p. diagrs., illus., tables.

Diesel engine development on the Clyde, by Charles Day. Grennock, England, "Telegraph" printing works, 1939. 18 p. diagrs., illus., tables.

Diesel engine for aircraft, by Victor W. Page. (In his Simplified guide to modern aircraft. New York, Norman W. Henley, 1939. p. 237-39. diagrs., illus.)

Diesel engineering, by J. W. Anderson. New York, McGraw-Hill book company, 1939. 269 p. diagrs., illus., tables.

Diesel engineering handbook, by L. H. Morrison. New York, Diesel publishers, 1939. 992 p. diagrs., illus., tables.

Diesel engines; theory and design, by Howard E. Degler. Chicago, American technical society, 1939. 270 p. diagrs., illus.

Diesel handbook, by Julius Rosbloom. Jersey City, N. J., Diesel engineering institute, 1939. 720 p. diagrs., illus., tables.

Étude expérimentale de la combustion dans les moteurs à injection, par R. Duchêne. Paris, E. Blondel la Rougery, 1939. 33 p. diagrs., tables. (Pub. scient. tech. Min. de l'air, no. 149)

Gemischbildung und verbrennung im Dieselmotor, von A. Pischinger und O. Cordier. Wien, Julius Springer, 1939. 127 p. diagrs., illus., tables.

General review of development of Diesel engine during 1938. London, Diesel engine users association, 1939. 47 p. diagrs., illus., tables.

Handbuch für flugmotorenkunde, von Franz Merkle. Berlin, E. Wette, 1939. 200 p. diagrs., illus., tables.

Internal combustion engines, by Lester C. Lichty. New York, McGraw-Hill book company, 1939. 603 p. diagrs., illus.

Die Mechanischen verluste der schnellaufenden Dieselmotore und ihre ermittlung mit dem schleppversuch, von Kurt Ullmann. Berlin, V.D.I. verlag, 1939. 38 p. diagrs., illus., tables.

BOOKS AND PAMPHLETS

The Modern Diesel. London, Iliffe and sons, 1939. 254 p. diagrs., illus., tables.
